

## How to Adjust Student Tutoring Settings

From the Growth Dashboard, click **Settings** and **Tutor Settings**

The screenshot shows the Growth Dashboard interface. On the left, there is a sidebar with buttons for HOME, REPORTS, SETTINGS (which is highlighted with a blue box), and LOG OUT. The main content area has tabs for ASSESSMENT SETTINGS, TUTOR SETTINGS (which is highlighted with a blue box), and CLASSROOM MANAGER. The 'TUTOR SETTINGS' tab is active, displaying a 'Configure Tutoring' table. The table has columns for Student Name, Student Language, Practice Reading In, English Tutor Practice Mode, English Tutor Amira Speaks In, and Spanish Tutor Practice Mode. Three student rows are listed: Matthew Alvarez (Bilingual, English and Spanish, Early Reader, English, English, Standard), Scott Gibbs (English, English, Standard, Spanish, Spanish, Standard), and Megan Hart (English, English, Standard, English, English, N/A).

The screenshot shows the 'Configure Tutoring' table in more detail. The 'Student Language' column is highlighted with a blue box. The 'Spanish Tutor Practice Mode' column for the third student (Megan Hart) has a cursor hovering over it, indicating it can be edited.

In the **Student Language** column, choose Bilingual if the student will read in both English and Spanish or if Amira will provide Spanish tutoring support for English texts

In the **Practice Reading In** column, choose which language(s) the student will be reading when using Reading Assistant

In the **English Tutor Practice Mode** and **Spanish Tutor Practice Mode** columns, choose Standard Practice to align with the student's instructional reading level. Choose Early Reader to focus on foundational reading skills

The **Spanish Tutor Practice Mode** column will automatically fill in N/A if the student will not be reading in Spanish. Alternatively, you can select Standard or Early Reader.
