Alignment with Research & Evidence-Based Word Lists

Alignment to Research & Evidence-Based Word Lists

Quick Reference

A. Fry Words Number and Word Reference¹

The Fry list is organized by frequency of occurrence in general reading material.

- **First 25 Words:** Account for approximately **33%** of all published material.
- **First 100 Words:** Comprise approximately **50%** of all publications.
- **First 300 Words:** Represent about **65–67%** of all written material (textbooks, news, etc.).

B. *SPIRE* 4th Edition Alignment Table Reference Key

This alignment table identifies the Word Card (referencing Color, Level, and Card #) and the *SPIRE* Lesson where high-frequency words become readable through mastery of phonetic concepts or sight recognition

- **Sight Words (Red) Word Cards:** These cards contain high-utility words that contain irregular sound-spelling patterns – Heart-Words.
 - These cards signal students to "stop". Students are taught that these words cannot be sounded out using typical rules; instead, they must stop and remember the word as a whole
- **Decodable 1 (Green) Word Cards:** These cards are decodable words that follow the specific phonetic concepts and rules already taught.
 - These cards signal students to "go". If a student forgets a green word, they are encouraged to "go for the sounds" and use their phonetic knowledge to decode it letter-by-letter rather than asking for the word
- **Decodable 2 (Yellow) Word Cards:** These cards are words that can be sounded out but contain less common sound-spelling patterns.
 - Students are instructed to "slow down and think" about what might be different before sounding the word out.

C. Dolch Sight Words Reference³

The Dolch list focuses on "service words" and high-utility nouns.

- **220 "Service Words":** Functional categories including pronouns, adjectives, adverbs, prepositions, conjunctions, and verbs, and **95 Nouns:** A specialized list of concrete, high-frequency nouns. These words typically constitute 50% to 75% of words in elementary texts and general print.

D. The CPB Word List Reference²

The Children's Picture Book (CPB) list provides a modern research-based audit of frequency.

- **Predictive Value:** Frequency norms in this list strongly predict the "**age of acquisition**," aligning with natural word learning. The CPB words account for nearly **48%** of unique words encountered in modern children's literature.

SPIRE 4E Research & Evidence-Based Word Lists Alignment Table

This section displays the alignment between the SPIRE 4th Edition instructional sequence and evidence-based word lists.

- **Sight Words (Red) Word Cards:** High-utility words that contain irregular sound-spelling patterns – Irregular Heart Words.
- **Decodable 1 (Green) Word Cards:** Decodable words that follow the specific phonetic concepts and rules already taught.
- **Decodable 2 (Yellow) Word Cards:** Words that can be sounded out but contain less common sound-spelling patterns.
